

# 2024 FIRST QUARTER NEWSLETTER

## Louisiana: Now Open for Business

It is safe to say that our State is making positive moves towards industrial growth. Earlier this year, Governor Landry signed an Executive Order streamlining the permitting processes associated with LDEQ and LDNR, ensuring that the energy industry can thrive in Louisiana.

In December, the EPA approved Louisiana's application for primacy over Class VI injection wells for Carbon Capture and Sequestration (CCS) sites. The approval of this application will reduce permitting time and ensure that operations adhere to environmental regulations.

On April 18, FG filed oppositions to Petitioners' and Alexander's writ applications with the Louisiana Supreme Court. Also, the amicus briefs were filed by ACC, GBRIA, and LCA on FG's behalf.

## 2024 Legislation to Watch

Despite the Governor's best efforts to make Louisiana a pro-industry state, there have been several anti-CCS bills proposed this session. Thanks to the lobbying efforts of LMOGA, LCA, LABI, and Industry Makes, most of these bills failed to pass out of committee.

The remaining anti-CCS bills are:

- ✓ HB 169 by Rep. Robby Carter
- ✓ HB 516 by Rep. Shane Mack

## Louisiana's Opportunity - The Science Behind CCS

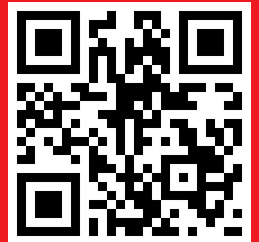

The TJC Group has been developing a video series on the science behind CCS technology and its importance to our economy. After several months of production, the wait is finally over!

Please be on the lookout for the completed CCS video series in your email inbox Monday morning.

## OUR MISSION

To be a trusted source of industrial communications, while advocating for future investment and the industrial growth that is the backbone of Louisiana.
